A Vision for the Class of 2020

Kids who entered Kindergarten this year will graduate in 2020 and their sources for learning are vastly different. Learn how your organization can cast off its dusty bifocals and help education leaders explore the “new” technologies of today from experts who can teach 1,000 educators a month and still make it home in time for dinner. Join this action-packed session where learners are also teachers, anyone can publish, cell phones are our friends, and engaging media is essential. See you there.

The Presenters:

Jared Covili

Jared specializes in teaching strategies for classroom integration of technology such as GPS (Global Positioning Systems), web page design, and digital cameras. His background is in secondary education where Jared was a Language Arts teacher at the high school level. Jared received his Bachelors degree in English and his Masters degree in Instructional Design and Educational Technology from the University of Utah. Besides his work at UEN, Jared is also adjunct faculty for the College of Education at the University of Utah, where he teaches technology integration classes to undergraduate students.

Tim Stack

Tim provides the expertise behind the Utah Education Network professional development web academy. He trains teachers throughout the state in the areas of technical skills and technical integration and hosts UEN's weekly Faculty Lounge webcast. After more than a few career changes, Tim discovered education. He spent five wonderful years teaching junior high math, mostly working with special populations. He received his Bachelor of Science in marketing and Bachelor of Arts in geography with a math minor, his secondary education certificate, and his M.Ed. in Instructional Design and Educational Technology all from the University of Utah.

Laura Hunter

Laura is Director of Instructional Services for Utah Education Network and Station Manager for KUEN-TV. She taught 8 years in an elementary gifted/talented magnet school, and was the State Internet Specialist in Utah. She holds several board positions with national public TV and education groups. Laura has a Masters Degree in elementary and gifted education, and a Ph.D. in teaching and learning. She teaches in the College of Education at the University of Utah. Her research interests include constructivist teaching, school change, and educational technology use in classrooms. She uses TiVO, GPS, ½ the capacity of her iPod, and paid a teenager to enter contacts into her cell phone.
