

Comprehensive Business Solutions for Community Licensees

NETA presents a business services ensemble that offers "best practices" financial functions, increased staff flexibility, and instant access to a comprehensive range of reports and data analyses. These services are an expansion of those NETA currently provides to some of the most respected organizations in broadcasting and education.

Using the latest technology and a streamlined reporting process, NETA Business Center has designed cost effective business solutions for community licensees. Our centralized services will increase productivity of multi-tasked staff and reduce personnel costs. More importantly, station management will gain access to industry-wide expertise and customized services at an affordable price.

After a one-time start-up charge, Business Center fees are based on the average volume of activity and remain consistent throughout the contract period.

For more information, contact Anita Sims at 803-799-5517 or anita@netaonline.org.
